

FEATURES & BENEFITS

universal grease for precision elements

LOGISTIC DATA

Type	M-33/200 ML
Index Ergom	E05CE-01010101601
Quantity in package [ml]	200

An all-round, low viscosity and colourless penetrating lubricant. Main applications: lubricating micro-motors, gears, connectors, rotating and linear contacts, loosening rusted and corroded nuts, bolts, etc. The preparation prevents current leakage and short-circuits on contacts. Eliminates squeaking from windows and doors. Prevents locks from freezing. Doesn't contain silicone. Safe for most plastics.
