

Compressed gas (non-flammable), B-55 type

FEATURES & BENEFITS

for quick removal of dirt and moisture

for use in live electrical circuits

does not leave condensation

LOGISTIC DATA

Type	B-55/400 ML
Index Ergom	E05CE-01010100301
Quantity in package [ml]	400

Advanced design aerosol of a dry gas which acts like compressed air. Used for quick removal of dust, dirt and humidity from delicate and inaccessible areas (thanks to the thin-cane). Suitable when solvents cannot be used, B-55 does not leave any residue nor condensation, being extremely pure. It doesn't affect any kind of material and, because of its characteristic of non-flammability, can be applied on live electrical equipment. Excellent for cleaning optics and lenses. Ideal if periodically employed in eliminating humidity and dust always present computer cabinets and often causing damages to the hardware.
