

FEATURES & BENEFITS

Flux removal agent

LOGISTIC DATA

Type	F-02/200 ML
Index Ergom	E05CE-01010100601
Quantity in package [ml]	200

A very useful product that eliminates the toughest residues of flux remaining after soldering elements to PC boards and frequently causing oxidation in conductive electric system parts. It is also an extremely effective cleaner and degreaser for printed circuit boards and all kinds of electric and electronic elements. It evaporates full without leaving any tarnish. It is also a perfect solution used to prepare printed circuit boards for coating V-66 insulating varnish. The product is compatible with most plastics.
