

FEATURES & BENEFITS

cutting rubbered pipes at required quality of edge cutting

good tool blade routing between pipe notches

shears can be locked in closed position

LOGISTIC DATA

Type	NKO 36
Index Ergom	E02KK-09010400201
Weight [kg]	0,164

Shears are designed to cut plastic crimped tubes (polyamide, PVC, polyethylene) such as WT, RK, RKR, covered by the Ergom offer. Cutting is performed by slightly rotating the tube. Cutting is recommended along the notch bottom as the tool blade is guided better between notches. Shears are blocked in a closed position.
Body material: Al alloy.

MECHANICAL DATA

Max. diameter of the pipe to be cut [mm]	36
