

Wire stripper, Weicon No. 7 Solar

FEATURES & BENEFITS

-  equipped with one round cable insulation stripping socket, automatically adjusting to flat and round cable insulation thickness
-  cable insulation cutting depth can be pre-set
-  one insulation stripping socket, automatically adjusting to cable insulation thickness
-  equipped with cable cutter

LOGISTIC DATA

Type	WEICON NR7 SOLAR
Index Ergom	E06NZ-01049000271
Weight [kg]	0,21

Automatic wire stripper used for round single- and multi-wire conductors, commonly used in photovoltaic systems. Specially shaped wire stripper uninsulating blades adjust themselves to the thickness and type of the insulation removed from a solar conductor. This design ensures very accurate and repeatable insulation removal, which applies both to outer and inner insulation, securing simultaneously the inner insulation and conducting wires against mechanical damages. Unlimited stripping length.

MECHANICAL DATA

Length [mm]	190
